PROFILE

Data Scientist with 4 years of experience at Allianz Global Investors, engineering analytics solutions for €176B in global Fixed Income portfolios. Built performance attribution models and 20+ automated reports using Python, SQL, and Power BI. Strong client-facing skills from conducting on-site requirements gathering with portfolio managers across global offices and presenting complex analytical findings to senior stakeholders. UCL Physics and Mathematics graduate with foundation in statistical modelling.

SKILLS

Programming: Python, SQL, R, Pandas, NumPy, Scikit-learn

Visualisation: Matplotlib, Seaborn, Plotly, Power BI, Jupyter Notebook

Tools: Databricks, PostgreSQL, Azure, Git, MSCI BarraOne, Bloomberg

Certifications: DataCamp Data Science Professional; LIBF Level 6 Diploma in Trading (Distinction)

Languages: English (Native), French (Proficient)

EXPERIENCE

Allianz Global Investors

Aug 2022 – Present

Solution Architect

London, UK

- Engineered custom performance attribution models, workflows and 20+ reports using Python, SQL and Power BI with data from MSCI BarraOne and Databricks, saving £25,000 per report and £15,000 annually in maintenance
- Conducted regular on-site meetings with portfolio managers across global offices to gather requirements, translating complex investment and risk needs into technical specifications and scalable analytics solutions
- Managed cross-functional delivery for 10+ investment teams (100+ professionals), coordinating a team of 9 analysts and external SMEs to migrate performance attribution to BarraOne, reducing report delivery from T+3 to T+1
- Developed Power BI dashboard for FCA Consumer Duty compliance, enabling the UK Board to identify vulnerable client trends and fund-level issues through quarterly reporting with quarter-on-quarter delta analysis
- Directed AI training workstream, hosting sessions with industry experts and consultants to upskill 200+ senior managers and operations professionals on AI strategy and applications
- Evaluated AI vendor proposals worth £3M+ for AI agents and GenAI implementations, assessing architecture quality and ROI—recommendation accepted by senior leadership
- Resolved performance bottlenecks in complex data transformations by migrating processing logic to Python, reducing execution time by 70%

Allianz Global Investors

Jun 2022 – Aug 2022

Investment Infrastructure Intern

London, UK

- Automated all 4 data reconciliation processes between State Street custodian (IBOR) and legacy portfolio management system using SQL and VBA, removing the need for 4 external contractors and saving £200,000+ annually

NF Capital

Oct 2020 – May 2022

Head of Fixed Income

London, UK

- Led team of 3 analysts producing quantitative research reports in Rates, Credit and FX that informed investment committee decisions

UCL Innovation Lab

Jun 2021 – Aug 2021

Machine Learning Intern

London, UK

- Developed ML-focused Python exercises applying supervised and unsupervised learning to interdisciplinary science problems, now integrated into the Natural Sciences curriculum and used by 560+ students
- Presented research findings to 200+ professors and peers with explanations tailored to diverse technical backgrounds

Amplify Trading

Aug 2020

Summer Intern

London, UK

- Built algorithmic trading strategy in Python using SMAs that outperformed S&P 500 buy-and-hold by 67%
- Ranked 2nd of 70+ interns with +23.4% annual return in equity portfolio management simulation

EDUCATION

University College London

Sep 2019 – Jun 2022

BSc Natural Sciences (Physics, Mathematics & Statistics) – 2.1

London, UK

Relevant coursework: Linear Models & the Analysis of Variance, Practical Machine Learning for Physicists, Mathematical Methods

PROJECTS & INTERESTS

NutriPlan – AI meal planning app: ML-driven recommendation engine with vector embeddings for semantic meal retrieval, UK-standard nutrition calculations (Python, FastAPI, PostgreSQL)

Lineup – iOS concert tracking app with Python data pipeline aggregating 6 APIs, cross-source artist deduplication using MusicBrainz IDs (Swift, Supabase, PostgreSQL)

Football (UCL 1st XI Captain), Chess (Top 1% globally), Personal Tutor (100% A* success rate)
